

vimi fasteners

fastening your success

COMPANY PROFILE

“

“It is necessary to be united, not just to stay united, but to accomplish something together”

J.W. Goethe

Mission

Provide highly engineered fastening solutions in the most challenging industrial applications for our global customers.

Values

We create increasing value and performance through **continuous improvement and systematic innovation**, leveraging the creativity of all our stakeholders.

The new factory is more and more “widespread intelligence” with the centrality of the person facing consciously the challenge of sustainability.

Fabio Storchi
Cavaliere del Lavoro

THE PERSON AT THE CENTER

People are our greatest resource.

We promote a culture of engagement, empowerment and individual development, recognizing contributions and results.

DOING TOGETHER

It's our motto. People at Vimi Fasteners work as a team and they integrate their skills and knowledge to achieve outstanding results.

WE CARE ABOUT OUR STAKEHOLDERS

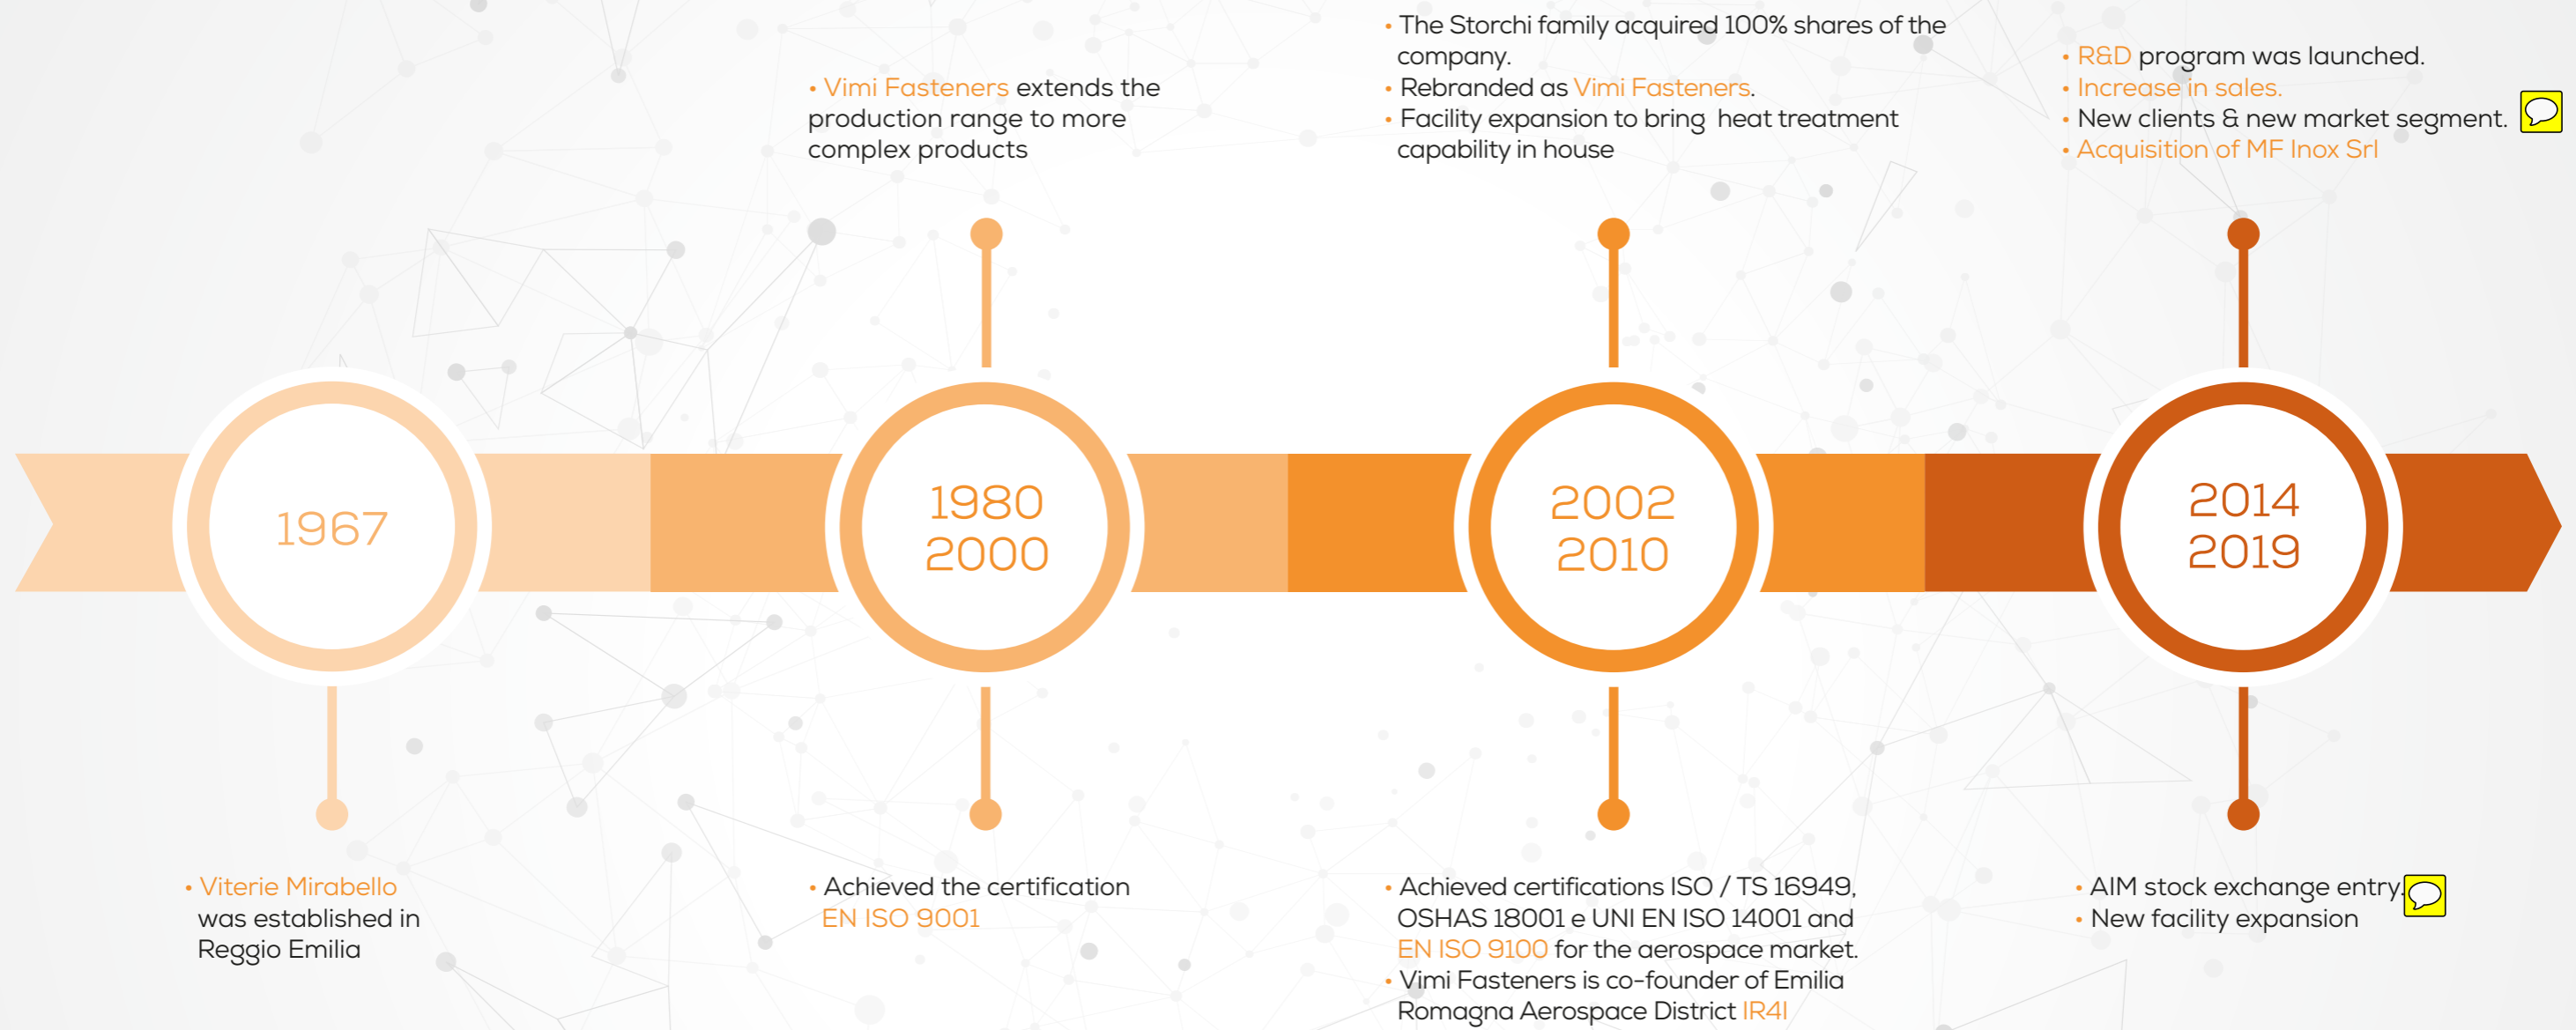

Vimi Fasteners creates value and increasing performance for short- and long- term according to the stakeholders' expectations.

PROFESSIONAL BEHAVIOR

People at Vimi Fasteners work with transparency and integrity establishing relationships based on trust and mutual respect.

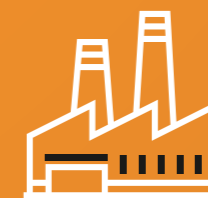

A long history of success

Over the years Vimi Fasteners has acquired extensive engineering skills, experience and technical know-how that has contributed to its image and high-level reputation with the customers.

PEOPLE

ENGINEERING KNOW HOW

PARTNERSHIP

Growth and development

Established in 1967 Vimi Fasteners operates in the field of high-precision mechanical components and is a leader in the design and production of highly engineered fasteners for the automotive, industrial oil & gas and aerospace sectors.

The Group operates in partnership with its customers and develops customised solutions, which are exported worldwide. State of the art technologies enable Vimi Fasteners to produce high-performance fasteners with the most exotic raw materials.

We aim to contribute to our customers' success through design, co-engineering and manufacturing of high-end fasteners.

CUSTOMERS

MARKETS

Automotive and supercars

Vimi Fasteners manufactures and supplies special and critical fastener systems for powertrain applications as follows:

- Connecting rod screws, screws and studs for cylinder heads, flywheel screws and adjusting screws
- Screws, studs and turbine shafts for turbochargers
- Screws and studs for exhaust systems
- Screws and studs for braking systems
- Screws for suspensions and wheels
- Screws and studs for gears and differential axles

Vimi offers its customers full availability for co-engineering activities to fulfil the most challenging industry needs and project specific requirements.

MARKETS

Industrial & commercial vehicles

Vimi Fasteners is leader in the design and production of **critical and special fastener systems for high performance applications in commercial vehicles' powertrain, agricultural machinery and industrial and marine engines.**

Vimi Fasteners offers co-engineering activities with its customers in order to guarantee the best solution in terms of functionality and production processes.

MARKETS

Energy and oil & gas

Vimi Fasteners supplies special and critical fasteners to the Oil & Gas market through the subsidiary MF Inox Srl. **These fastener systems are resistant to corrosion and are made to withstand in high and low temperature environments.** 

Based on the customer's needs the company offers:

- Production of low and medium quantities
- Wide range product offering
- Prompt deliveries
- Quality products
- Fasteners made of special alloys
