

## MISE CONTRIBUTION ON INNOVATIVE RESEARCH PROJECTS

Novellara, 22 October 2019

On 15 October Vimi Fasteners received the authorization from the Ministry of Economic Development and the Emilia Romagna Region to start a three-year technological innovation program entitled "**Development of innovative design methodologies and production knowledge for highly performing fastening systems for Aerospace , Motorsport, high-end Automotive / Supercar applications and for new mild and full electric engines**", with an expected investment in R&D of around € 6 million and an expected contribution of € 1.5 million.

The program aims to innovate the design of fastening systems, using special materials and light alloys normally used in the aerospace, motorsport and supercar sectors.

It will allow the acquisition of new knowledge relating to the special materials being researched, as well as the production processes for the transformation of materials into finished products.

The research project will lead to the implementation of new process technologies and the creation of a new production line with dedicated machines built specifically for the processing of these new products for the aerospace and motorsport sector

Sectors that Vimi Fasteners has started to serve in recent years and where it plans to grow significantly in the future, taking advantage of the strong growth expected globally.
